REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-15 are allowable because none of the prior art of record suggests a collimating system that includes the first wall of the element and the second wall of the adjacent element forming a wedge-shaped structure widening in a direction away from the light source, the first wall and the second wall at a side facing the wedge-shaped structure being provided with a specular reflecting surface, the wedge angle θ_w of the first wall and the second wall with respect to the normal on the aperture window being adjustable. WAGNER (US 2,387,816) shows embodiments of plural elements of diffusing members (28) to 2-part baffles (50,51), which are disclosed as light transmitting and diffusing plastic (page 2, col.1, lines 30-31, page 2, col.2, lines 29-30, page 3, col.1, lines 11-14) for glowing signals (page 3, col.1, lines 34-36), which teaches away from the adjustable collimation with specular reflective first and second walls about the aperture window. KAMSVAG (WO 9012245) shows reflective first and second walls forming a wedge-shape structure widening in a direction toward the light source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
